weba Werkzeugbau

SPECIALIST IN INNOVATIVE FORMING TECHNOLOGY

About weba Werkzeugbau

Since 1982, weba Werkzeugbau has established itself as a leading provider in the development and production of tools for cold and hot forming. With over 300 employees across three locations - in Austria, the Czech Republic, and Germany - the company combines cutting-edge technology with extensive expertise to meet the demands of the automotive industry.

Mission and Objectives

weba Werkzeugbau focuses on addressing the growing demands of the automotive sector, including the development of lightweight, safe, and sustainable vehicle designs, as well as the optimization of production processes. Custom-tailored tooling solutions enable customers to sustainably enhance the productivity and quality of their forming processes. The company's primary target audience includes OEMs and Tier-1 suppliers.

Locations and Core Competencies

- **Headquarters in Dietach, Austria:** Center for research and development, dedicated to implementing innovative ideas and technologies.
- **Olomouc, Czech Republic:** Competence center specializing in the production of tools for hot forming and serial production.
- **Attendorn, Germany:** Since 2021, Gatzsch Schweißtechnik GmbH has expanded the portfolio with expertise in joining technologies and welding techniques.
